Profile

Fast learning and initiative-taking autodidact with English as a first language.
Currently working as an intern at MinervaXR, developing a Learning Management System from the ground up.
Began learning JavaScript and React independently then later finished a Development course at SV College.
Looking for a Full Stack Developer position which will allow me to utilize my relevant experience and knowledge.

Technical Knowledge

- Front-End: HTML, CSS, JavaScript, ReactJS
- Back-End: Node.JS, Express
- Databases: MongoDB, Firestore
- DevOps/Workflow: Docker, GitHub, Jira
- Cloud: AWS (EC2), Firebase
  *Familiarity with: Python, Java, SQL

Professional Experience

August 2022 – Present

Full-Stack Developer (Intern), MinervaXR
- Working as part of a small team of Ful Stack Developers to develop a Learning Management System from the ground up. My contributions include updating the API, maintaining the database, and building a sizable portion of the Front End.
- This position requires constant communication amongst fellow team members as well as between other teams such as that of QA, design, Unity, and management.

October 2022 - Present

Python Instructor, Nitzanim Program
- Teaching 10th graders Python while following a strict syllabus intended to prepare students for Army service in cyber units.

Education

January 2022 – June 2022

SV College
- Fullstack Development Program
- Focus on MERN Stack (MongoDB, Express, React, Node)

October 2021 – January 2022

Codecademy
- Certificate of completion (Front-End Development)
- Certificate of completion (JavaScript)

Languages

Hebrew – Fluent | English - Native
