Profile

More than two years of experience working on professional and personal projects. Fast learning and initiative-taking autodidact with English as a first language.
Has experience in planning, prototyping, and developing a product from the ground up. Very passionate about learning and creating. Looking for a Full Stack, Front End or Back End Developer position which will allow me to utilize my relevant experience as well as grow as a developer.

Technical Knowledge/Experience

- **Databases**: MongoDB, Firestore, mySQL
- **Front-End**: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, jQuery, Svelte
- **DevOps/Workflow**: Docker, GitHub, Jira, Jenkins, EC2, ECR, Netlify, Heroku
- **Cloud**: AWS (EC2), Firebase, Mongo Atlas
- **Web3**: Solidity, Web3 Integrations
- **Back-End**: Node.JS, Express, PHP
- **Testing**: Jenkins, Mocha

Professional Experience

Software Developer, Cambium LTD, April 2023 - Present
• Developing a wide variety of solutions for several projects ranging from custom websites, automation and internal management systems for companies.

*Was previously in charge of project coordination and development of the product of a foreign client.
Soft Skills: Flexibility, problem solving, teamwork, planning, time management, autonomous learning.
