## Education

**Full-Stack Development, SV College,** May 2022
Deepened understanding of React, Express, APIs and server-side development with Node.js while utilizing NoSQL databases such as MongoDB.

**JavaScript, Codecademy**
Learned data types, asynchronous programming, loops, data sorting and manipulation.

**Frontend, Codecademy**
Course centralized around React.js, HTML, CSS.

## At my ideal first job I will:

• Work on the Front-End, Back-End or Both!

• Will work as part of a team

• Will use one or more of the technologies listed below

## What I currently do:

• Working as part of a team to build a LMS interface from the ground up for a start-up company

• Instructing a Python course for High School students part-time

• Push commits to GitHub almost daily

• Work on personal projects on my free time

• Learn new technologies and strengthen my skills in between projects

## Knowledge & Skills:

• Front-end: HTML, CSS, JavaScript, React

• Back-end: Node.js, Express

• Databases: MongoDB, Firestore, NoSQL

• DevOps: Docker

• Cloud: AWS (EC2), Firebase

*Also familiar with: Python, Java, SQL

## Languages:

• English – Native

• Hebrew – Fluent

## Work Experience:

### *MinveraXR - Intern*                   *08/2022-Present*

Working as part of a team to develop a learning management system to track trainee progress. Technologies used include React.js, Node.js, JavaScript, HTML, CSS, AWS, Firebase, and Docker

Please see my *portfolio* for a full summary of my experience!
